Kishore Prakash

Senior iOS Engineer | Building Scalable iOS Apps | Swift • Mobile
Architecture | Creator of Stotramala, Thoughtcast Magic
Bengaluru, Karnataka, India

Summary

I'm an iOS engineer with 9+ years of experience building scalable, high-quality mobile applications across enterprise and product environments.

My work focuses on designing reliable iOS architectures, improving app performance, and delivering intuitive user experiences using Swift and modern Apple frameworks.

Currently I work as a Senior Software Engineer at JLL, contributing to enterprise mobile platforms and building robust iOS solutions used in real-world business environments.

Previously, I worked as a Lead iOS Engineer at Jio Platforms, where I helped build and scale large mobile products and contributed to improving engineering practices within the iOS team.

Beyond my professional work, I also build independent products. I created Stotramala, a multilingual iOS application designed to provide easy access to traditional stotras and devotional content on mobile devices.

I enjoy solving complex engineering problems, refining mobile architecture, and continuously exploring new technologies in the Apple ecosystem.

Core Skills

- iOS Development (Swift)
- Mobile Architecture & Scalable App Design
- Performance Optimization
- REST APIs & Backend Integration
- CI/CD for Mobile Apps
- App Store Deployment

Experience

JLL

Senior Software Engineer

November 2023 - Present (2 years 10 months)

Bengaluru, Karnataka, India

- Developing enterprise-grade iOS applications used in business-critical workflows
- Designing scalable mobile architecture and improving application performance
- Collaborating with product managers, designers, and backend teams to deliver high-quality mobile features
- Improving development workflows and maintaining clean, modular codebases

Jio Platforms Limited (JPL)

Lead iOS Engineer

October 2022 - November 2023 (1 year 2 months)

Bengaluru, Karnataka, India

- Led iOS development for large-scale mobile applications
- Designed scalable architecture for high-traffic mobile products
- Collaborated with cross-functional teams to deliver production-ready features
- Mentored engineers and improved development practices within the team

CGI

3 years 9 months

Lead Analyst

June 2021 - October 2022 (1 year 5 months)

Bengaluru, Karnataka, India

- Designed and developed enterprise mobile applications using Swift
- Integrated backend services and REST APIs to support business workflows
- Improved app stability and performance across releases

Senior Software Engineer

February 2019 - May 2021 (2 years 4 months)

Bengaluru Area, India

- Developed and maintained production iOS applications
- Implemented new features and optimized existing mobile components
- Worked across the full mobile development lifecycle

Mindtree

Senior Software Engineer

April 2017 - February 2019 (1 year 11 months)

Bengaluru, Karnataka, India

- Developed iOS applications integrating with Bluetooth headsets and wearable audio devices
- Implemented Bluetooth Low Energy (BLE) communication for device connectivity and control
- Built features for device pairing, firmware interaction, and real-time headset status management
- Worked closely with hardware and firmware teams to ensure reliable device communication
- Improved connection stability and optimized Bluetooth performance across devices
- Contributed to full mobile development lifecycle including design, development, testing, and deployment

IDS NEXT Business Solutions Pvt Ltd

iOS Developer

September 2016 - April 2017 (8 months)

Bengaluru Area, India

Cosmonet Solutions

Software Engineer

October 2014 - August 2016 (1 year 11 months)

Bengaluru Area, India

Develop a clean, simple and easy to use iOS application with swift.

Education

Impact College Of Engineering And Applied Sciences

Bachelor of Engineering (BE), Computer Science · (2010 - 2014)
