PROFESSIONAL SUMMARY

Mobile engineering lead with 11+ years designing, building and shipping iOS applications and SDKs across enterprise, telecom and semiconductor products. Currently at JLL on the Corrigo facilities-management suite, working across a 15-person mobile team. Owns mobile architecture end to end — app and SDK design through CI/CD, release and App Store delivery — with published SDKs used by NXP and Jabra partner teams and three App Store products of my own.

CORE COMPETENCIES

Mobile Architecture & Technical Ownership • iOS / Swift & SwiftUI • Kotlin Multiplatform (KMP) • SDK & Framework Design • NFC & Bluetooth Low Energy
CI/CD & Release Engineering • Team Leadership & Mentoring • Cross-Functional Stakeholder Management • App Store & Enterprise Distribution • Performance Optimisation

TECHNICAL SKILLS

Languages: Swift, Objective-C, Kotlin, C++, Python, Bash

Platforms: iOS, iPadOS, macOS, watchOS, visionOS, SwiftUI, UIKit, AVFoundation, Core Location, Kotlin Multiplatform (KMP), Android

Connectivity: NFC, Bluetooth Low Energy, Secure Element, Universal Links, Push Notifications

Architecture & APIs: Mobile architecture, SDK & framework design, Swift Package Manager, CocoaPods, REST, JSON

CI/CD & Testing: GitHub Actions, Jenkins, Bamboo, Travis CI, Fastlane-style release automation, XCTest, XCUITest, Cucumber (BDD)

Data & Tooling: SQLite, Core Data, Realm, Plist, MySQL, MongoDB, DocC, AsciiDoc, Doxygen, Xcode, Git (GitHub, Bitbucket, GitLab), SVN, Datadog, Google Mobile Ads

PROFESSIONAL EXPERIENCE

JLL (Jones Lang LaSalle) — Bengaluru, India

Senior Software Engineer

Nov 2023 – Present

- Build and ship iOS apps across JLL's Corrigo facilities suite — Corrigo, Corrigo Enterprise and CorrigoPro — in 19 languages, including QR- and NFC-driven service requests.
- Own mobile architecture decisions for a 15-engineer team working across Swift, Objective-C and Kotlin.
- Led the CocoaPods to Swift Package Manager migration, delivered ahead of schedule, and wrote the migration guide other teams adopted.
- Led the Datadog integration on iOS, improving observability and diagnostics across the mobile estate.
- Cut login time by roughly 50% and screen load times by up to 80% across the Corrigo apps.
- Cut CI/CD build and release time by 30% on GitHub Actions, and grew XCTest coverage each release.
- Standardised localisation and font accessibility across the suite.

Jio Platforms Limited (JPL) — Bengaluru, India

Lead iOS Engineer

Oct 2022 – Nov 2023

- Led iOS for JioAICloud (Storage & Photos) from v58.0.0 with a team of 6.
- Architected and shipped Platform, a short-video product, from scratch — owned architecture and the feature roadmap.
- Drove an app-size reduction programme on JioAICloud, cutting the binary by 25% to improve install conversion on low-bandwidth connections.
- Designed scalable architecture for high-traffic products and mentored engineers on modularity and testing.

CGI — Bengaluru, India

Lead Analyst

Jun 2021 – Oct 2022

- Led iOS SDK engineering for NXP's MIFARE 2GO, turning a phone into a contactless transit ticket via a certified secure element.

- Owned the SDK lifecycle: public API design, provisioning and payment flows, XCTest, a reference demo app and AsciiDoc/DocC docs.
- Ran Jenkins CI/CD for multi-platform library builds and worked with NXP's core team on card structures.

Senior Software Engineer

Feb 2019 – May 2021

- Built mWallet2GO, an iOS SDK for contactless Mastercard and VISA payments via the secure element in phones and wearables.
- Developed TapLinX, a Swift/Objective-C/C++ library for reading and writing NFC Forum tag types, used by NXP's own apps.
- Shipped and maintained NXP's public NFC apps — TagInfo, TagWriter and AppXplorer.

Mindtree — Bengaluru, India

Senior Software Engineer

Apr 2017 – Feb 2019

- Built the Jabra Universal SDK for macOS and iOS — device settings, call control and firmware update across the headset range.
- Implemented BLE communication for pairing, firmware interaction and live headset status; improved connection stability across devices.

IDS NEXT Business Solutions Pvt Ltd — Bengaluru, India

iOS Developer

Sep 2016 – Apr 2017

- Built Stay Ahead, letting guests of IDS-network hotels hold rooms, order room service and watch the folio bill live.
- Developed Pulze247, giving hotel owners real-time property statistics and business-critical KPIs as graphs.

Cosmonet Solutions — Bengaluru, India

Software Engineer

Oct 2014 – Aug 2016

- Built Spizza for a Singapore pizza chain — menu and combo ordering, payment gateway, reservations and outlet maps.
- Developed Personal Carpool, letting drivers and riders publish, match and manage rides.

SELECTED PROJECTS

Corrigo — JLL | 2023 – present | team of 15

Occupant-facing facilities app. *Swift, Kotlin, Objective-C, NFC, GitHub Actions, XCTest.*

MIFARE 2GO — NXP Semiconductors (via CGI) | 2021 – 2022 | team of 2

iOS SDK for NXP's cloud service that turns a phone into a contactless transit ticket. *Swift, NFC, Secure Element, Jenkins, XCTest, AsciiDoc, DocC.*

Stotramala (Multilingual) — Independent | 2020 – present | team of 1

My own App Store product: a multilingual reference library of over 7,000 Hindu stotras, ashtottaras and vedamantras. *Swift, YouTube API, Google Mobile Ads, Universal Links.*

Also shipped: Corrigo Enterprise, CorrigoPro (JLL); JioAICloud — Storage & Photos, Platform — Short Video App (Jio Platforms); mWallet2GO, TapLinX, NFC TagInfo by NXP, NFC TagWriter by NXP, AppXplorer (NXP Semiconductors); Jabra Universal macOS & iOS SDK, Jabra iOS SDK, Jabra Softphone Plugins for macOS (Jabra); American Red Cross Employee App; ThoughtCast, OmniSense — Magic & Mindreading (Independent); Stay Ahead, Pulze247 (IDS NEXT); Spizza, Personal Carpool (Cosmonet Solutions).

EDUCATION

Bachelor of Engineering (BE), Computer Science

2010 – 2014

Impact College of Engineering and Applied Sciences, Bengaluru | Visvesvaraya Technological University

CERTIFICATIONS, AWARDS & LANGUAGES

Certifications: DevOps Practitioner; AMCAT Certified Software Development Trainee.

Awards: Going Beyond, CocoaPods to SPM migration (JLL, Jul 2026); Star Award, Intentional Impact (JLL, Jun 2025); Ovations Certificate of Appreciation (JLL, Q4 2024); Ovations JLLT Superstar (JLL, Q1 2024); Spot On Award (x2) (Mindtree); Employee of the Month (Cosmonet Solutions); IBM Hackathon (IBM); Hitachi Programmers Marathon (Hitachi); WeChat Internship Programme (WeChat).

Languages: Kannada — native or bilingual; Telugu — native or bilingual; English — professional working; Hindi — limited working.
