

Kishore Prakash

MOBILE ENGINEERING LEAD

Bengaluru, Karnataka, India · +91 89717 87176 · kishore.balasa@gmail.com
linkedin.com/in/kishorebalasa · kishoreprakash.in · github.com/kishore-prakash

PROFILE

Mobile engineering lead with 11+ years designing, building and shipping iOS applications and SDKs across enterprise, telecom and semiconductor products. Currently at JLL on the Corrigo facilities-management suite, working across a 15-person mobile team. Owns mobile architecture end to end — app and SDK design through CI/CD, release and App Store delivery — with published SDKs used by NXP and Jabra partner teams and three App Store products of my own.

Mobile Architecture & Technical Ownership

iOS / Swift & SwiftUI

Kotlin Multiplatform (KMP)

SDK & Framework Design

NFC & Bluetooth Low Energy

CI/CD & Release Engineering

Team Leadership & Mentoring

Cross-Functional Stakeholder Management

App Store & Enterprise Distribution

Performance Optimisation

TECHNICAL SKILLS

LANGUAGES

Swift, Objective-C, Kotlin, C++, Python, Bash

APPLE PLATFORMS

iOS, iPadOS, macOS, watchOS, visionOS, SwiftUI, UIKit, AVFoundation, Core Location

CROSS-PLATFORM

Kotlin Multiplatform (KMP), Android

CONNECTIVITY

NFC, Bluetooth Low Energy, Secure Element, Universal Links, Push Notifications

ARCHITECTURE & APIS

Mobile architecture, SDK & framework design, Swift Package Manager, CocoaPods, REST, JSON

CI/CD

GitHub Actions, Jenkins, Bamboo, Travis CI, Fastlane-style release automation

TESTING

XCTest, XCUITest, Cucumber (BDD)

DATA

SQLite, Core Data, Realm, Plist, MySQL, MongoDB

DOCUMENTATION

DocC, AsciiDoc, Doxygen

TOOLING

Xcode, Git (GitHub, Bitbucket, GitLab), SVN, Datadog, Google Mobile Ads

EXPERIENCE

JLL (Jones Lang LaSalle)

Bengaluru, India

Global commercial real-estate services firm. Corrigo is JLL's facilities-management and CMMS product suite.

Senior Software Engineer

Nov 2023 – Present

- Build and ship iOS apps across JLL's Corrigo facilities suite — Corrigo, Corrigo Enterprise and CorrigoPro — in 19 languages, including QR- and NFC-driven service requests.
- Own mobile architecture decisions for a 15-engineer team working across Swift, Objective-C and Kotlin.

- Led the CocoaPods to Swift Package Manager migration, delivered ahead of schedule, and wrote the migration guide other teams adopted.
- Led the Datadog integration on iOS, improving observability and diagnostics across the mobile estate.
- Cut login time by roughly 50% and screen load times by up to 80% across the Corrigo apps.
- Cut CI/CD build and release time by 30% on GitHub Actions, and grew XCTest coverage each release.
- Standardised localisation and font accessibility across the suite.

Jio Platforms Limited (JPL)

Bengaluru, India

Reliance Jio's digital-platforms arm; consumer apps at national scale.

Lead iOS Engineer

Oct 2022 – Nov 2023

- Led iOS for JioAICloud (Storage & Photos) from v58.0.0 with a team of 6.
- Architected and shipped Platform, a short-video product, from scratch — owned architecture and the feature roadmap.
- Drove an app-size reduction programme on JioAICloud, cutting the binary by 25% to improve install conversion on low-bandwidth connections.
- Designed scalable architecture for high-traffic products and mentored engineers on modularity and testing.
- Maintained Jenkins CI/CD and XCTest suites, and represented iOS in cross-functional planning.

CGI

Bengaluru, India

Global IT services firm; engagement delivered NFC and secure-element products for NXP Semiconductors.

Lead Analyst

Jun 2021 – Oct 2022

- Led iOS SDK engineering for NXP's MIFARE 2GO, turning a phone into a contactless transit ticket via a certified secure element.
- Owned the SDK lifecycle: public API design, provisioning and payment flows, XCTest, a reference demo app and AsciiDoc/DocC docs.
- Ran Jenkins CI/CD for multi-platform library builds and worked with NXP's core team on card structures.
- Integrated REST backends behind enterprise mobile workflows and improved stability release over release.

Senior Software Engineer

Feb 2019 – May 2021

- Built mWallet2GO, an iOS SDK for contactless Mastercard and VISA payments via the secure element in phones and wearables.
- Developed TapLinX, a Swift/Objective-C/C++ library for reading and writing NFC Forum tag types, used by NXP's own apps.
- Shipped and maintained NXP's public NFC apps — TagInfo, TagWriter and AppXplorer.
- Wrote the developer-facing SDK documentation and release notes partner integrators worked from.

Mindtree

Bengaluru, India

IT services firm; engagement delivered macOS and iOS SDKs and plugins for Jabra (GN Audio).

Senior Software Engineer

Apr 2017 – Feb 2019

- Built the Jabra Universal SDK for macOS and iOS — device settings, call control and firmware update across the headset range.
- Implemented BLE communication for pairing, firmware interaction and live headset status; improved connection stability across devices.
- Developed macOS Jabra Softphone plugins bridging Skype, Bria and Avaya to Jabra hardware for remote call control.
- Worked with hardware and firmware teams on reliable device communication, and wrote the manuals shipped to integrators.
- Delivered an enterprise iOS app for American Red Cross employees behind Microsoft Enterprise SSO.

IDS NEXT Business Solutions Pvt Ltd

Bengaluru, India

Hospitality ERP vendor.

iOS Developer

Sep 2016 – Apr 2017

- Built Stay Ahead, letting guests of IDS-network hotels hold rooms, order room service and watch the folio bill live.
- Developed Pulze247, giving hotel owners real-time property statistics and business-critical KPIs as graphs.
- Defined app flow and UI with the design team and coordinated delivery with backend.

Cosmonet Solutions

Bengaluru, India

Product engineering studio serving APAC clients.

Software Engineer

Oct 2014 – Aug 2016

- Built Spizza for a Singapore pizza chain — menu and combo ordering, payment gateway, reservations and outlet maps.
- Developed Personal Carpool, letting drivers and riders publish, match and manage rides.
- Owned app flow and task assignment for a two-engineer team, interfacing with backend and UI/UX.

PROJECTS

22 shipped products and libraries, grouped by type.

Enterprise applications

Corrigo

2023 – present

JLL · TEAM OF 15

Occupant-facing facilities app. Raise a maintenance request by scanning a QR code or tapping an NFC tag on the equipment itself, then track status, review proposals and verify completed work.

- QR/NFC scan-to-request in seconds.
- Work-order status tracking and proposal review.
- Standard and urgent messaging.

Swift, Kotlin, Objective-C, NFC, GitHub Actions, XCTest

Role: New feature development; App performance optimisation; CI/CD ownership

<https://apps.apple.com/in/app/corrigo/id1244213800>

Corrigo Enterprise

2023 – present

JLL · TEAM OF 15

CMMS for facilities teams — work-order automation, asset tracking and preventative-maintenance scheduling, kept in sync with the desktop platform. Ships on iPhone, iPad and visionOS in 19 languages.

- Work-order creation, assignment and escalation.
- Asset history and preventative-maintenance scheduling.
- NFC and QR scanning from asset and work-order screens.
- Dark mode and dashboard widgets.

Swift, Objective-C, NFC, GitHub Actions, XCTest

Role: Feature development; Mobile architecture; Release engineering

<https://apps.apple.com/in/app/corrigo-enterprise/id1057410388>

CorrigoPro

2023 – present

JLL · TEAM OF 15

The service-provider side of Corrigo. Technicians receive requests, post real-time updates and document work with photos — with geofencing that checks them in and out automatically as they arrive at and leave a site.

- Geofenced automatic check-in / check-out.
- Photo and text work documentation.
- Centralised customer communication.

Swift, Core Location, GitHub Actions, XCTest

Role: Feature development; Location and geofencing work; CI/CD

<https://apps.apple.com/in/app/corrigopro/id995080706>

JioAICloud — Storage & Photos

2022 – 2023

JIO PLATFORMS · TEAM OF 6

Consumer cloud storage for photos, video, documents, music and contacts — automatic backup, cross-device access and shared collaboration on trips, events and projects.

- Automatic and manual backup to JioCloud.
- Access from any phone or PC.
- Shared albums and collaboration.

Swift, Objective-C, Jenkins, XCTest

Role: Feature development from v58.0.0; App size reduction; CI/CD ownership

<https://apps.apple.com/in/app/jioaicloud-storage-photos/id1001974993>

Platform — Short Video App

2022 – 2023

JIO PLATFORMS · TEAM OF 6

Short-video product built from scratch — create and publish short videos as stories. I owned the architecture and led the team through delivery.

- Built from zero to App Store.
- Architecture owned end to end.
- Feature roadmap proposed and driven.

Swift, Objective-C, AVFoundation

Role: App architecture; Team guidance; Stakeholder communication; Development from scratch

No longer on the App Store

American Red Cross Employee App

2017 – 2019

TEAM OF 1

Enterprise iOS app giving American Red Cross employees a single entry point to their internal applications, behind Microsoft Enterprise SSO.

Swift, Microsoft Enterprise SSO

Role: App development; Enterprise distribution

Stay Ahead

2016 – 2017

IDS NEXT · TEAM OF 2

Universal iPhone/iPad app for guests of IDS-network hotels — hold rooms, order room service and watch the folio bill update in real time.

Swift

Role: iOS development; Task assignment; App flow and UI design; Backend and UX coordination

No longer on the App Store

Pulze247

2016 – 2017

IDS NEXT · TEAM OF 2

Real-time property dashboard for hotel owners and general managers — the vital, business-critical numbers as live graphs on their phone.

Swift

Role: iOS development; Task assignment; App flow; Backend and UX coordination

<https://apps.apple.com/us/app/pulze247/id1035543880>

Spizza

2014 – 2016

COSMONET SOLUTIONS · TEAM OF 2

Ordering app for a Singapore pizza chain — menu and combo ordering, payment gateway, table reservations and outlet maps.

Swift, Payment Gateway

Role: iOS development; Task assignment; App flow; Backend and UX coordination

<https://apps.apple.com/sg/app/spizza/id603030085>

Personal Carpool

2014 – 2016

COSMONET SOLUTIONS · TEAM OF 2

Universal iPhone/iPad carpooling app letting drivers and riders publish, match and manage rides.

Swift

Role: iOS development; Task assignment; Backend and UX coordination

No longer on the App Store

SDKs and developer tooling

MIFARE 2GO

2021 – 2022

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 2

iOS SDK for NXP's cloud service that turns a phone into a contactless transit ticket. Digital credentials live in an EAL 5+ certified secure element and extend beyond transit into access control and loyalty.

- Card provisioning and contactless payment APIs.
- Reference demo app for integrators.
- AsciiDoc and DocC integration documentation.

Swift, NFC, Secure Element, Jenkins, XCTest, AsciiDoc, DocC

Role: iOS library development; Unit testing; Demo app; CI/CD; SDK documentation

<https://www.nxp.com/products/security-and-authentication/secure-service-2go-platform/mifare-2go:MIFARE2GO>

mWallet2GO

2019 – 2021

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 2

iOS SDK for contactless Mastercard and VISA payments through the secure-element chip inside a phone or wearable.

Swift, Secure Element, Bamboo, XCTest, Cucumber

Role: iOS library development; Unit and BDD testing; Demo app; CI/CD; SDK documentation

<https://www.nxp.com/pages/mwallet-2go:MWALLET2GO>

TapLinx

2019 – 2021

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 3

iOS library for reading and writing NFC data across NFC Forum tag types. Consumed internally by TagInfo, TagWriter and AppXplorer.

Swift, Objective-C, C++, NFC, Bamboo

Role: iOS library development; Multi-platform build pipeline; Core-team collaboration on card structures

<https://www.nxp.com/design/design-center/software/rfid-developer-resources/taplinx-software-development-kit-sdk:TAPLINX>

Jabra Universal macOS & iOS SDK

2017 – 2019

JABRA (VIA MINDTREE) · TEAM OF 2

One SDK across macOS and iOS for talking to Jabra headsets — device settings, call control and firmware update — shipped with a demo app showing integrators how to use it.

Swift, Bluetooth LE, Jenkins, XCTest

Role: SDK development; Unit testing; User manuals and release docs; Client feature planning

<https://developer.jabra.com/>

Jabra iOS SDK

2017 – 2019

JABRA (VIA MINDTREE) · TEAM OF 2

iOS framework for communicating with Jabra Bluetooth devices — settings and firmware update — plus the reference demo app.

Swift, Bluetooth LE, Jenkins, XCTest

Role: Framework development; Unit testing; Documentation; Client communication

<https://developer.jabra.com/>

Jabra Softphone Plugins for macOS

2017 – 2019

JABRA (VIA MINDTREE) · TEAM OF 1

macOS background service bridging softphones — Skype, Bria, Avaya — to Jabra hardware for remote call control.

Swift, macOS, Jenkins, XCTest, Doxygen

Role: Skype plugin development; CI maintenance; Unit testing; Bria and Avaya features; Release documents

<https://www.jabra.com/software-and-services/jabra-direct>

NFC and connectivity apps

NFC TagInfo by NXP

2019 – 2021

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 2

Reads NFC Forum Type 2, Type 4 and Type 5 tags — including NXP's NTAG, ICODE and MIFARE platforms — and auto-executes the NDEF payload: open a URL, join Wi-Fi, import a vCard, drop a map pin, place a call.

Swift, Objective-C, NFC, Bamboo

Role: App development; CI/CD; Core-team collaboration on card structures

<https://apps.apple.com/us/app/nfc-taginfo-by-nxp/id1246143596>

NFC TagWriter by NXP

2019 – 2021

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 2

Writes contacts, bookmarks, geo locations, Bluetooth handover, SMS and mail records to NFC tags — posters, business cards, anything with an NFC inlay — then reads back and launches apps from what it finds.

Swift, Objective-C, NFC, Bamboo

Role: App development; CI/CD; Core-team collaboration on card structures

<https://apps.apple.com/us/app/nfc-tagwriter-by-nxp/id1246143221>

AppXplorer

2019 – 2021

NXP SEMICONDUCTORS (VIA CGI) · TEAM OF 2

Discover smart-city services around you, then load and manage credentials over the air on an NFC device — event and hotel-room access, transport and bike rental.

Swift, Objective-C, NFC, Bamboo

Role: App development; CI/CD; Core-team collaboration on card structures

No longer on the App Store

Independent products

Stotramala (Multilingual)

2020 – present

INDEPENDENT · TEAM OF 1

My own App Store product: a multilingual reference library of over 7,000 Hindu stotras, ashtottaras and vedamantras. I run the whole thing — development, content pipeline, releases, ads and support.

- 7,000+ stotras, ashtottaras and vedamantras.
- Multilingual script support.
- YouTube integration and Google Ads monetisation.
- Universal links via stotramaala.app.

Swift, YouTube API, Google Mobile Ads, Universal Links

Role: Sole developer; Full development and production lifecycle

<https://apps.apple.com/in/app/stotramala-multilingual/id1523220364>

ThoughtCast

2017 – present

INDEPENDENT · TEAM OF 1

A performance tool for mentalists: the performer sees what a spectator is writing or drawing, live, as it happens. Bluetooth pen link plus on-device handwriting recognition.

Swift, Bluetooth LE, Google ML Kit

Role: Sole developer; Full development and production lifecycle

<https://apps.apple.com/us/app/thoughtcast/id1311918486>

OmniSense — Magic & Mindreading

2019 – present

INDEPENDENT · TEAM OF 1

Reveals which card, coin or object a spectator picked, using NFC tags read by the iPhone — with a companion Apple Watch app so the performer never touches their phone.

Swift, NFC, watchOS

Role: Sole developer; iPhone and Apple Watch apps; Full production lifecycle

<https://apps.apple.com/us/app/omnisense-magic-mindreading/id1475017007>

AWARDS AND RECOGNITION

13 recognitions, newest first.

JLL

4 AWARDS

Going Beyond — “Killing CocoaPods for good”

Jul 2026

Thank You award for moving iOS off CocoaPods to Swift Package Manager ahead of schedule, simplifying builds and dependency setup, and writing the migration guide other teams adopted. Nominated by Petr Urban.

Star Award — “Intentional Impact”

Jun 2025

Recognised under the Be Intentional value for leading the Datadog integration on iOS, weighing business value against technical complexity, and consistently helping beyond scope. Nominated by Petr Urban.

Ovations — Certificate of Appreciation

Q4 2024

Presented by Radha Dhir, CEO and Country Head, India, for delivering outstanding service.

Ovations — JLLT Superstar

Q1 2024

Presented by Radha Dhir, CEO and Country Head, India, and Ashok Jayakumar, for operational excellence, innovative solutions and stakeholder management.

Spot On — “Partnership”

Feb 2019

Recognised for partnership — collaborative spirit, unrelenting dedication and expert thinking — for support on the Schedule F module. Nominated by Pavana Mandyakrishnegowda, Module Lead.

Spot On — “Accountability”

Jan 2019

Recognised for accountability — collaborative spirit, unrelenting dedication and expert thinking. Nominated by Meghana Ramesh, Senior Engineer.

Master Mind — “Expert Thinking”

Dec 2018

Awarded for expert thinking after helping another team deliver work they could not have completed without support. Presented by Hormuz M. Gotla, General Manager, and Deepak D, Senior Technical Manager.

A-Team — Exemplary Team Spirit

Jan 2018

Awarded for displaying exemplary team spirit. Presented by Sanju Mannaret Sarasan, Technical Manager, and Nikhil Joseph, Test Lead.

Unstoppable — Execution Excellence

Jul 2017

Awarded for displaying execution excellence, for the work that made the iOS SDK project a success. Presented by Jyothy Krishnan Nair, Senior Project Manager, and Shrinivas Budi, Technical Manager.
